**Description** Complainant states odors that he attributes to Ostrom's mushroom farm are causing a nuisance. He noted an odor yesterday, but did not call. This AM at about 7:30 he was jogging in the vicinity of the golf course and noticed the odor. It persisted until at least 8:30 AM.

**Action** I drove out to the area at approximately 10:00 AM. The complainant said he believed the odor was from composting operations at Ostrom's Mushroom farm. This area has had a history of odor impacts from several sources. Driving past the Nutriom plant on Hogum Bay Rd en route to the complainant's home, I noted that the plume from Nutriom's wet scrubber was tending slightly to the south and west. There was an odor of the egg drying operation in the area in front of the plant. I proceeded down 31st Ave at about 5 mph with the windows open, toward the complainant's neighborhood. The odor persisted for several hundred feet

down 31st Ave before dissipating. I drove through Christa Heights once and did not detect any odors.

I drove along Willamette Drive to the golf course, with windows open and did not detect any odor along the way. I proceeded to Ostrom's, and noted that the plume from the Phase 1 building ventilation stack was tending to the east slightly. I then drove through the two adjoining neighborhoods. There was a slight but persistent odor of compost throughout the Rainier Vista mobile park to the east of the farm. There was no odor detected in Hawk's Ridge, north of the farm. The odors noted in the vicinity of the two plants are similar. An odor impact from the mushroom farm at the Christa Heights location can not be ruled out. However, based on the physical distance between the respective plants and the complainant's location (Ostroms = 2.0 + miles; Nutriom < 0.5 mile) and observed wind directions, it is likely that the odors reported by the complainant came from the Nutriom plant. Refer to the diagram attached to the hard copy of this report in the respective source files.

Phone Calls:

Ostrom's, Chris Street:

Left him a message on 3/28/03 at 1:15 PM. He is out of the office for training. I will call him Monday AM.

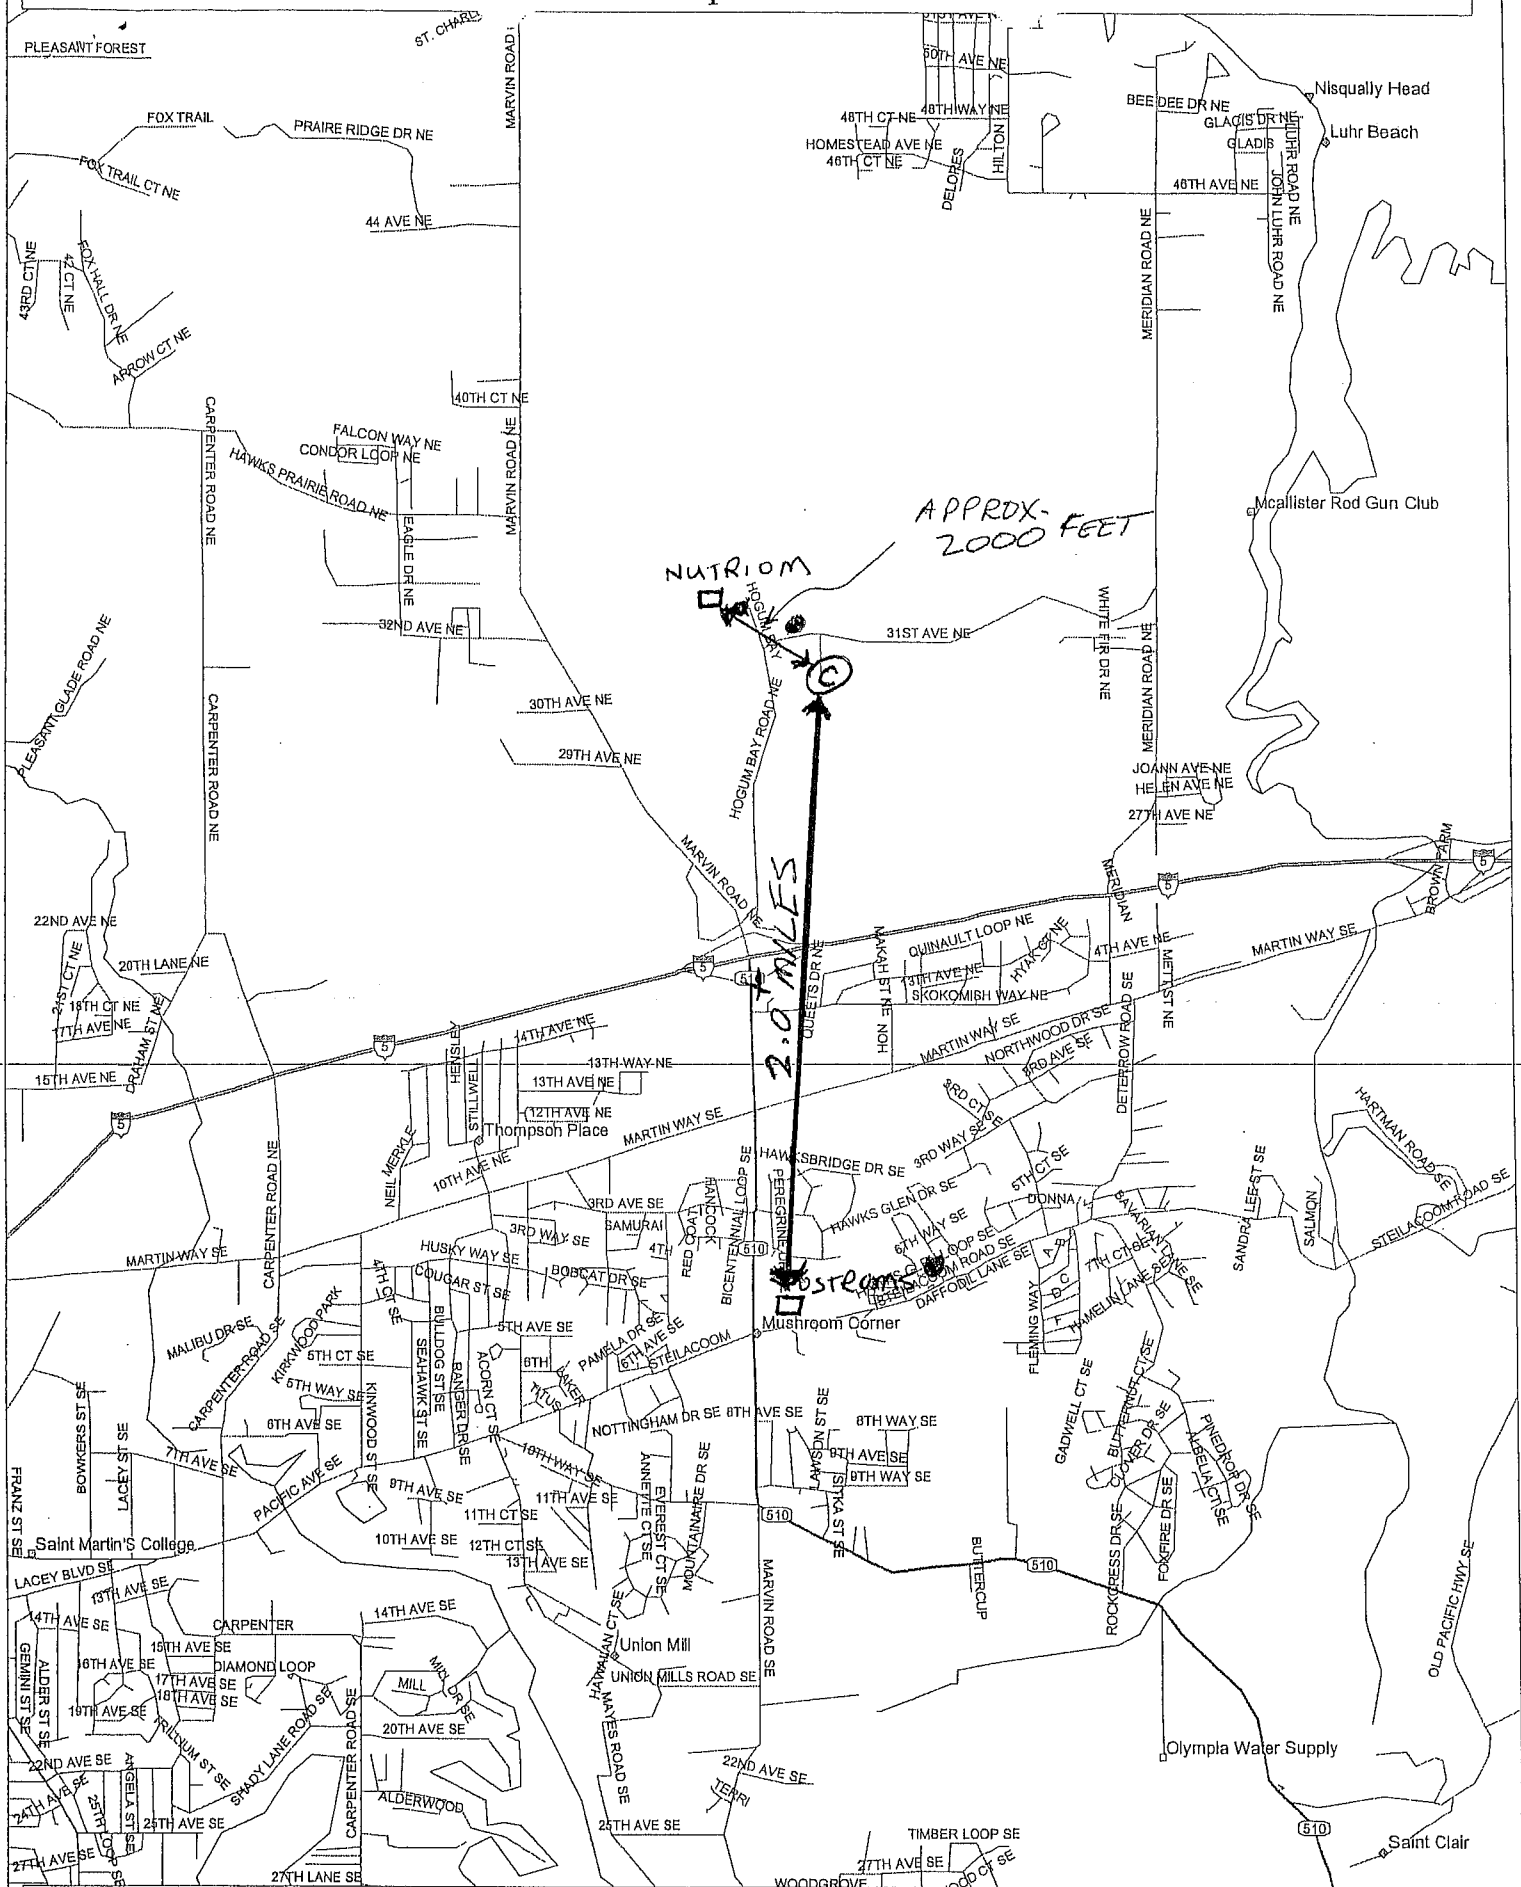

Nutriom, Ed Yoshihara:

3/28/03 at 1:20 PM:

Mr. Yoshihara states that Nutriom began drying a batch of egg product today at about 7:00 AM. They will be drying product until about 10:00 PM tonight.

Operations and maintenance are described as normal and the scrubber is "working fine."

Description The mushroom farm is stinking up Crystal Heights again. It has gotten worse over the past 5 years and worsened after they installed the odor control equipment. It stink 2 or three times a week. Today his whole house stinks.

Action Drove through Crystal Heights at noon and did not smell an odor.

Description    Caller could smell the Ostrom's at the time of the call. He has detected it 3-4 times this past week. He further reports that after living in the area for 5 years this winter/spring is the strongest the odor has been. On several occasions it would "choke" a person.

Action    The plume from Nutrium was lofting and heading north. I went to Christa Heights neighborhood. I detected a faint odor of compost at 0937. It was not strong enough for me to distinguish between the WARC compost center and Ostrom's.

NOV#    At 0944 I could smell compost odor from Ostrom's upwind of the WARC compost center near the inbound weigh station for the WARC. At 10:01 I was in the mobile home park on the east side of Ostrom's. No odor was detected. A water vapor plume was lofting to about 200 feet elevation before leveling and heading to the north. At 1007 in the housing development on the north side of Ostrom's I noted a

green stack that was emitting a water vapor plume. It was not lofting and appeared to be headed north at a much lower elevation. I did not detect any odors in that area.

Description Caller left a voice mail message in the AM reporting objectionable odors he identified as coming from the mushroom farm.

Action I contacted the party in the early afternoon after retrieving his message. The odor had dissipated by this time. I was therefore unable to verify the odor in the field. I advised the party to dial "O" to contact the receptionist next time if he was put into voicemail. En route to another complaint later in the day I drove past the mushroom farm along Marvin Road. There was no objectionable odor noted at that time.

Description Caller reporting objectionable odors he identified as coming from the mushroom farm.

Action 8/7/03 9:50 AM

NOV#

I responded in the field. No odors were noted during a drive through of the complainants' neighborhood. At Ostroms, I met with Bill Street, Ostroms President. He stated that there had been a problem with the company which hauls away the spent compost, Great Western Supply (O'Neill Brothers). They had a series of truck maintenance problems and were unable to pick up the compost for several days. This did not pose a problem until they resumed hauling away the compost. When Ostroms broke open the piles to load the trucks, it became obvious that the compost had gone anaerobic in the interior of the piles. It is likely that the release of the odors from the soured compost

combined with atmospheric conditions to impact the complainants.

John Kelly

**From:** Harold Aspgren [Roopsmm@comcast.net]  
**Sent:** Thursday, August 07, 2003 8:44 AM  
**To:** John Kelly  
**Subject:** Extreme Odor, 8/7, 8:25 A.M.

John,

This confirms our telecon on 8/7 at 8:35 A.M.

I believe this particular odor is from the mushroom facility south east of Christa Heights. I noticed this around 8:25 and Richard Trittipio observed it 5 minutes later.

Thanks for your assistance.

Description Complainant noted odors about 9:00 AM this morning while driving on Martin Way. He believes they were from the mushroom farm.

Action I spoke with the complainant about actions taken the previous day (See complaint log and/or Inspection files) and encouraged him to call Bill Street at Ostroms and

NOV# also ORCAA when the problem recurs.
