

RE: Public Records Request

June 15, 2022

Jean Mendoza
3142 Signal Peak Road
White Swan, WA 98952

Dear Ms. Mendoza,

The Agency received your public records request on 3/3/2022 for the following:

“ All YRCAA Clean Air Plans that identify how much pollution is in our air, where it comes from, and how to control it most effectively. I request access to and copies of all YRCAA monitoring data for the criteria air pollutants ground-level ozone, lead, nitrogen dioxide, and sulfur dioxide in Yakima County. The time frame is January 1, 2017 to the present.”

The information you have requested can be found in the link below.

Comprehensive air emissions for 2017 are found at the link below under the Department of Ecology. At the same air emissions website, you can find other air pollutants. For the air monitoring data are found under the interactive map [Interactive Maps \(wa.gov\)](#) you can click on any monitor on the map and download all data from the site.

YRCAA like most air agencies, do not have all monitors like ground-level ozone, lead, nitrogen dioxide, and sulfur dioxide monitors. The YRCAA jurisdiction is Yakima County except the Yakama Reservation, which is under the United State Environmental Protection Agency (US EPA) jurisdiction. However, we are not sure if US EPA maintains or have such monitors within the reservation area in Yakima County where you live.

Other data can be accessed from US EPA website [Index of /Air/nei \(epa.gov\)](#)

For air emission inventory data, Department of Ecology maintains the records. Under [Air emissions inventory - Washington State Department of Ecology](#)

As a result, this agency considers this request fulfilled and closed as of the date mentioned above.

If you have any questions or concerns please call (509) 834-2050, ext. 102 or email at pro@yrcaa.org.

Sincerely,

Pamela Herman
