**Last Noticed** 03/18/18 all day

**Description** Extremely Urgent. Odor.

The problem is what appears to be an ammoniated stench that comes from the mushroom farm. I've lived at the address above since July of 2013. The smell at that time was not what it is today - it has gotten worse over time - in a more chemical way - and is at times nauseating. I cannot work in my yard, open my windows or just sit on my deck in spring and summer. There is a stretch of Marvin Way that sometimes smells so bad I cannot walk by it and breathe.

I am making this complaint to your agency as the company responsible has let it be known that they do not care about the impact they have on surrounding neighbors. I submit to you that if any individual household emitted this pollution they would be forced to stop.

Please take my complaint seriously as the situation has been getting progressively worse over time.

Thank you,

Susan Porter
